The Definitive Guide to the McKinsey Problem Solving Test (PST) (Part 1 of 2) (Hint: Bookmark This Page - It's Long) The McKinsey Problem Solving Test (also known as the McKinsey PST) is a math computation, data interpretation and logical thinking test used by McKinsey to determine which candidates are granted a first round case interview.

McKinsey Problem Solving Test - PST | Caseinterview

at: Ruhr University, Bochum In the context of the competition "Built on IT professions in the construction industry with a future", young professionals were honored for their outstanding and practice-oriented IT solutions - including the special Startup Award for a spin-off of the SFB 837.

SFB 837 - Ruhr-University Bochum

Novel nitrene insertion. An intramolecular insertion reaction of Rh nitrene into amide C=N and sulfonamide S=N bonds has been developed (see figure) via the unprecedented formation of an N + N ylides from the Rh nitrene and the amide nitrogen.

Chemistry A European Journal: Early View

Cryptography or cryptology (from Ancient Greek: $\kappa\rho\upsilon\pi\tau\omicron\sigma$, translit. $\kappa\rho\upsilon\pi\tau\omicron\sigma$ "hidden, secret"; and $\gamma\rho\alpha\phi\eta\iota\varsigma$ graphein, "to write", or $\lambda\omicron\gamma\iota\alpha$ -logia, "study", respectively) is the practice and study of techniques for secure communication in the presence of third parties called adversaries. More generally, cryptography is about ...

Nowadays, one of the major challenges in the wastewater sector is the successful design and reliable operation of treatment processes, which guarantee high treatment efficiencies to comply with effluent quality criteria, while keeping the investment and operating cost as low as possible.

CFD-aided modelling of activated sludge systems

The texture-related shape anisotropy of cup drawn metallic sheet parts is referred to as earing or ear formation. It is a characteristic phenomenon associated with the crystallographic texture and the resulting elastic-plastic anisotropy of metals.

Construction safety is a national and worldwide issue. This paper contributes in solving this problem by applying automated safety rule checking to Building Information Models (BIM).

Building Information Modeling (BIM) and Safety: Automatic

ABSTRACT: Five relatively recent applications of reinforcement learning methods are described. These examples were chosen to illustrate a diversity of application types, the engineering needed to build applications, and most importantly, the impressive results that these methods are able to achieve.

Introduction & Summary Computer system users, administrators, and designers usually have a goal of highest performance at lowest cost. Modeling and simulation of system design trade off is good preparation for design and engineering decisions in real world jobs.
