Television Image Quality - GBV

Television (TV), sometimes shortened to tele or telly, is a telecommunication medium used for transmitting moving images in monochrome (black and white), or in colour, and in two or three dimensions and sound.

Television - Wikipedia

Image quality can refer to the level of accuracy in which different imaging systems capture, process, store, compress, transmit and display the signals that form an image.

Image quality - Wikipedia

Picture quality is the most important aspect of a TV. We define picture quality as the ability of a TV to represent as closely as possible the intent of the producer of the content. This means great blacks and accurate colors visible from any position or lighting condition. It doesn't mean an over-saturated or over-processed picture.

Our Picture Quality Score and Tests: TVs - RTINGS.com

How to Evaluate DLP, LCD, Plasma TV and HDTV Quality. How to understand the difference in quality between DLP, LCD, and Plasma TVs. Know the environment where you will use the TV. The level of ambient light will be a major factor. Also...

How to Evaluate DLP, LCD, Plasma TV and HDTV Quality

Ever since I bought my ps4 3 years ago and first started connecting it through my TV I felt like the quality of the image was not how it supposed to be.

Image quality on TVs - TV - Streaming Video & TVs

Previous research has demonstrated that form variables can increase television viewers' sense of presence. The current broadcasting of high-definition television (HDTV) programming makes testing this relation between form and presence possible in a new context, image quality.

Presence and Image Quality: The Case of High-Definition

Is the quality of the image good to begin with, but bad when you export a PDF? Is the image pixelated, or too low resolution, blurry, or what? Without the information above, my best guess is that you simply need to use a higher resolution image.
